

**3.11.4 Noise Comments and Responses**

**Comment 3.11-1 (Letter 4, CT Male Associates, July 1, 2010):** As a form of mitigation, it is suggested that prenotification be given to “area residents” a minimum of 24 hours prior to any planned blasting events.

***Response 3.11-1:*** *Not more than 20 days nor less than 5 days prior to a scheduled blast the permit holder will serve notice of intent to blast, stating when and where blasting activity is scheduled to occur, on the occupant or user and owner of each commercial or residential structure within one-half mile of the proposed blast site. In addition, the Forestburgh Fire Department, Forestburgh Town Clerk, and 9-1-1 will be notified not less than 5 days prior to a scheduled blast.*
